SCARIFIER ESC 5 MA

The SCARIFIER IKEDA, promotes the scarification and decompression of soils with minimum inversion of its surface, which make the direct crop ideal.

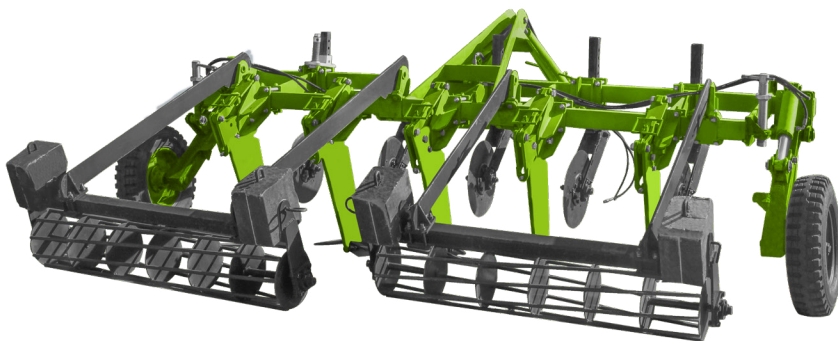

Attack nozzles

of its rods have side wings that allow the decompression of soils, even more humid soils.

Its rods are equipped with the disarming system per flat spring which protect the implement of impacts against obstacle in the soil.

Cut disks of 20" of diameter are equipped with spring to monitor the surface irregularities.

The pressure of the roll leveler maintained through the ballast in order to not impair the ability of machine penetration.
